TO WHOM IT MAY CONCERN

BY DESIRE C. MUSSA, MALAWI

Every year is just an ordinary number that reminds us that we are moving forward and there is no going backward. The level of our goals, actions, courage, passion and patience are indicators

that will distinguish our present year from previous one. We all know that a clock is just a simple tool that helps us manage our series of events within a given period of time. So, what blinds us to see a new year from a clock-watch point of view?

There is no power in a clock nor a new year. The power is already inside you. You just have to use your capabilities to tap the unlimited opportunities from this universe. You don't need to wait for wonders to happen while you are in a deep sleep. How long shall you keep on dreaming without living in it? Now, its time to wake up and start acting on those dreams. Which dreams? Your dreams of course! Why? Because no one else is going to do it for you! Those believing in your dreams might come and support you on the way, but you have to work on you first.

Someone says and am sure it is true, "What mind can dream of, it can achieve". Therefore, keep on dreaming positive things and develop the courage to work on those dreams. This is a great moment to gather your non-living dreams into a dream-converter and transform them into the living dreams.

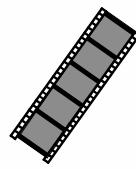

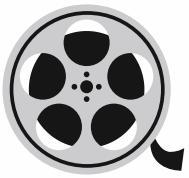

It is a fact that we have been sending and receiving the Happy New Year wishes to and from our friends and families. This is a great development. Is it? Yes! It shows that we were meant for each other. It is very important to wish our friends and families a successful and happy life. However, despite that wishes are greatest motivator, they are just like a motor vehicle engine without gasoline. It requires our energy to make a living in those wishes. For example, we used to receive academic exam best wishes during our old school time. However, it required our efforts in order for us to succeed in those exams. This should remind us that the responsibility of making our wishes into a living reality is in our hands. Quote me right here; I did not say that wishes are not important. In fact, wishes are fundamental mechanisms that motivate,

encourage, boost our energy and prepare us for a greater victory. So, we should find time to wish each other the very best in this life.

Years come and go. Every year, we wish each other a happy new year. The question might be; How can someone be happy in this paradoxical global? The answers to this question could be based on series of questions. Before you take any action or make choices, ask yourself these questions; Will this step leads to a place where peace of mind reigns? Will it be a stepping stone into the world of happiness? If the answer is "NO", please don't bother! If the answer is "YES", go ahead, because it is viable and worthy of doing.

Finally, if you want to make this year a happy and fruitful year, prepare to fight great battles and be a Victor. Put your mind on your dreams and believe that you can achieve what you want. Nevertheless, prepare to sacrifice your time, energy and resources. Above all, live with hope and put God first in everything you do. Your future is in God's hands, but your plans are your responsibilities. So, you must plan and let God directs your plan because HE knows the right way. It wont be easy but that doesn't mean that you cannot achieve. You will meet storms on the way, but that doesn't mean that you cannot sail your boat through the storm. If you let God directs your ship, and if you have the courage to carry on, I promise you that your wishes will be achieved in the real world. All you need to do right now is to dream big, plan greatly, act muhly and let God directs and gives you strength to carry on till you get to your desired destination.
